Important Data Reminders

- o Data and percentages were calculated using standard mathematical formulas.
- o Data are based on different trinomials (i.e., calendar year, school year, and five-year estimates). Readers should check each indicator and data source to determine the reported time period.
- o When a small number exists for a data source, data suppression may be used to protect confidentiality.
- o Data collection and methodology vary among sources and agencies. When comparing data from different sources, readers are encouraged to understand the different methodologies of each source.
- o Data presented may not be comparable due to different sources employing varying methodologies and sample sizes.
- o Data from different surveys or questionnaires may use different definitions for data indicators. It is advised to review the original source methodology to understand their definitions.
